Full-Stack Software Engineer | Next.js | React | Node.js | PostgreSQL | Founder, SafarOps

Professional Summary

Full-Stack Software Engineer with 2+ years of experience building scalable web applications, RESTful APIs, and cloud-based SaaS products. Founder of **SafarOps**, a transportation management platform for bus companies. Skilled in Next.js, React, TypeScript, Node.js, Express.js, PostgreSQL, and Prisma, with experience in authentication, role-based access control, CI/CD, and production deployment on Vercel, Render, and Supabase.

Skills

Frontend Development: Next.js, React.js, TypeScript, JavaScript, Tailwind CSS, Redux, React Query, HTML5, CSS3

Backend Development: Node.js, Express.js, RESTful APIs, JWT/SSO authentication, role-based access control

Databases & ORM: PostgreSQL, MongoDB, SQL, Prisma ORM, Sequelize, Mongoose, Supabase

Cloud & DevOps: Vercel, Render, Railway, Netlify, Docker, Git, GitHub, CI/CD workflows, production deployment

Integrations & Monitoring: Resend, Sentry, Postman, pgAdmin, MongoDB Atlas, error monitoring

Experience

FOUNDER & FULL-STACK SOFTWARE ENGINEER || SAFAROPS **04/2026 – 08/2026**

Transportation Management SaaS | Independent Product Development | www.safarops.com

- Independently designed, developed, deployed, and maintained a cloud-based system that digitizes operations for bus transport companies, owners, managers, and booking officers.
- Built responsive frontends with Next.js, React, TypeScript, and Tailwind CSS, and REST APIs with Node.js and Express.js, including validation, authentication, and role-based access control.
- Designed relational data models with PostgreSQL and Prisma ORM for operational and financial data.
- Implemented vehicle, crew, route, trip, booking, inventory, and maintenance workflows, with alerts for expiring permits, fitness certificates, insurance, and tax records.
- Built income/expense tracking, financial reporting, payroll workflows, and a Terminal Management module for schedules, ticket bookings, checkout, and printable tickets and vouchers.
- Deployed on Vercel, Render, and Supabase PostgreSQL; integrated Resend (email verification) and Sentry (error monitoring); used GitHub-based CI/CD workflows.

MERN STACK DEVELOPER || TECHBUGGS LAHORE **05/2025 – 11/2025**

- Collaborated with cross-functional teams to design and implement dynamic, responsive user interfaces for a UK-based healthcare client project using React.js, ensuring intuitive user experiences and high performance.
- Designed, developed, and maintained scalable RESTful APIs for the organization's calendar management system using Node.js and Express.js, ensuring efficient data handling and secure communication.
- Implemented Sequelize ORM to improve data interaction, database management, and query optimization.
- Developed RESTful APIs, including SSO login, ensuring secure authentication.

SOFTWARE ENGINEER || TECHVERX LAHORE **10/2024 – 01/2026**

- Successfully completed intensive training in SQL, JavaScript, React.js, and Node.js, developing practical skills in full stack web development and database management.
- Developed login/signup features with React and TypeScript, and built a Netflix clone and other frontend projects to strengthen practical skills.

TRAINEE || KNOWLEDGE STREAMS LAHORE **07/2024 – 10/2024**

- Completed 100-day MERN Stack Bootcamp, learning React.js, Node.js, Express, MongoDB, PostgreSQL, problem-solving, and professional soft skills.

Projects

Smart Irrigation System (FYP) **IUB 2023 / 2024**

Developed an IoT-based smart irrigation system with AI-driven soil moisture analysis to optimize water usage. Integrated real-time sensors (DHT11, soil moisture) with automated water flow and cloud monitoring, enhancing efficiency and reliability in smart agriculture.

Full-Stack E-Commerce Website (React | Node.js | Express | MongoDB) **(View Project)**

- Developed a **fully functional e-commerce platform** with user authentication, admin panel, and secure payment options.
- Implemented **authentication & authorization** using JWT and bcrypt.
- Enabled **product filtering, cart management, and real-time notifications** with React-Toastify.
- Backend hosted on **Railway**, frontend deployed on **Vercel**.
- Designed as a **scalable, production-ready application** demonstrating full-stack development proficiency.

CERTIFICATIONS Software Engineer Intern, Techverx; MERN Stack Trainee, Knowledge Streams

EDUCATION Bachelor of Computer Science | Islamia University of Bahawalpur **08/2020 – 06/2024**
